Objective

- Team Lead with 4.5+ years in Management, actively looking for full-time Software Engineer role.
- Software Engineer II with 4.5+ years in (T3 Stack), actively looking for full-time Software Engineer role.
- Software Engineer with 4.5+ years in (LAMP Stack), actively looking for full-time Software Engineer role.

Summary

A software engineer with over 4.5+ years entire experience more then 10+ project live and 3.5+ years industry experience full-stack development experience, specializing in JavaScript & PHP. Proven track record of designing scalable microservices and SaaS optimized application. Proficient in front-end (React, Next.js, PWA and Native), backend (Node.js, PHP), and databases (MySQL, PostgreSQL, MongoDB), with expertise in Docker and AWS for streamlined deployments.

Experience

Associate Team Lead

Codebotx [🔗](#)

D.G.Khan, PK

Nov 2025 – Present

- Led zero-downtime deployment initiatives for a large-scale TypeScript platform, ensuring uninterrupted service availability during critical releases and infrastructure upgrades.
- Refactored core services and shared libraries to enforce clean architecture principles, reducing technical debt and stabilizing long-term development velocity.

Associate Team Lead

Tech Solutions Pro [🔗](#)

Islamabad, PK

Apr 2025 – Nov 2025

- Architected a scalable microservices-based Amazon-style platform supporting FBM, vendors, sellers, wholesalers, and brand modules, accelerating multi-tenant onboarding by 35% and reducing deployment time by 40% through Docker and AWS ALB.
- Optimized subscription and order-management workflows using asynchronous microservice orchestration, cutting manual operations and overhead by 60%.

Associate Software Engineer

BloomRix [🔗](#)

Lahore, PK

Aug 2024 – Feb 2025

- Engineered a scalable multi-tenancy framework integrating CRM, HRM, and ERP modules, improving client onboarding speed by 35% and reducing deployment cycles by 40%.
- Delivered a centralized SSO authentication system, minimizing login redundancies and increasing authentication efficiency by 80%.

Associate Software Engineer

SA Communications [🔗](#)

Okara, PK

Jan 2023 – Jul 2024

- Developed a secure escrow-based payment infrastructure using BTCPay Server, enabling multi-currency transactions and improving transaction speed by 15%.
- Strengthened wallet security through BIP39 mnemonic recovery, increasing key recovery success rates by 30%.

Associate Software Engineer

eFAIDA Technologies [🔗](#)

Okara, PK

Apr 2023 – Dec 2023

- Delivered 10+ custom WordPress plugins, improving platform performance by 25% and maintaining a 95% client satisfaction rate.
- Architected headless CMS solutions using Strapi.js, reducing backend development time by 30% and improving API response latency by 20%.

Education

University of Okara
BS in Computer Science

Mar 2020 – Feb 2024

- CGPA: 3.43/4.0 (**3rd Position in Batch**)
- Awarded **Bronze Medal** for academic excellence.
- **Coursework:** Artificial Intelligence, Data Structures and Algorithms, Database Management Systems

Technologies

Languages:	TypeScript, JavaScript, PHP
Frameworks & Libraries:	Next.js, Nest.js, Laravel, Express.js, React.js React Native Zustand & Redux
Databases:	MongoDB, MySQL, PostgreSQL
ORMs:	Laravel Eloquent, Mongoose, Prisma
UI Frameworks:	Tailwind CSS, NextUI, Ant Design, DaisyUI, Material UI, Bootstrap
Technologies & Tools:	Docker, Kubernetes, Apache, Nginx, Redis, Kafka, Twilio
Cloud & Infrastructure:	AWS (EC2, ECR, S3, Route 53), Digital Ocean, Contabo
AI & Prompt Engineering:	OpenAI, DeepSeek, Gemini Pro & Notebook LM
Payment APIs:	Stripe, PayPal, Google Pay, Square

Projects

Samplethis (Next.js – Listing & Subscription)

[kamrankhoxa/samplethis](#) 

- Delivered a digital music platform offering premium sample packs via subscription and one-time purchase models.
- Launched a VST3 plugin marketplace with integrated licensing, downloads, and user dashboards for seamless plugin management.

Montamo Project Portal (Next.js – Customer Dashboard & VOC)

[montamo/project-portal](#) 

- Built a customer-facing construction project portal with OTP and Zitadel OIDC auth, multi-project selection, and a dashboard for calendar, documents, funding, and help content.
- Implemented a Django BFF proxy, Elfsquad CPQ VOC questionnaire integration, and Notion CMS-backed articles, deployed on Google Cloud Run with TypeScript, React 19, and Tailwind CSS v4.

WayveUK (Next.js – Listing & Rental Services)

[kamrankhoxa/wayveuk](#) 

- Developed Wayveuk, a student-focused marketplace platform enabling users to rent, buy, and sell products within the student community.
- Integrated seamless payment processing, delivery, and EasyShipping services, while offering value-added features such as free meal deals and student-exclusive offers to enhance user experience.

Maelano Phase-01 (MERN - Microservices Architecture)

[kamrankhoxa/maelano](#) 

- Architected a Dockerized microservices ecosystem for an Amazon-style e-commerce platform supporting FBM, vendors, wholesalers, and brand stores, deployed with AWS ALB.
- Reduced manual workload by 60% by decoupling order, subscription, and inventory services using asynchronous messaging.

Laboratory AI-Driven (Laravel - Listing & AI report)

[kamrankhoxa/labioneer](#) 

- Crafted a multi-tenant Laravel-based lab management platform with Single Sign-On, simplifying patient onboarding and reporting.
- Executed AI-based diagnostics where doctors/assistants upload sample data, triggering automated report generation and treatment suggestions.

WorkzenPro (Next.js & Laravel – HRM & Org Management)

[kamrankhoxa/workzen](#) 

- Established the foundation for the SaaS suite by enabling organization creation, domain setup, and super admin allocation.
- Enforced domain-based tenant routing and unified login systems for onboarding efficiency.

Vehicle Marketplace (Node.js – Listing & Features)

[kamrankhoza/m-motors](#) 

- Engineered a Node.js backend supporting vehicle listings, dealer profiles, messaging, and filters.
- Paired with Laravel frontend to deliver seamless booking workflows with role-specific access.

Bed Store (WordPress – Bricks & WooCommerce)

[kamrankhoza/bedstore](#) 

- Developed custom WordPress themes and plugins using Bricks Builder for product variations and pricing logic.
- Extended WooCommerce features for conditional pricing and dynamic selection interfaces.

Cab Booking Platform (WordPress – Elementor & WooCommerce)

[kamrankhoza/kwickcab](#) 

- Created a WooCommerce-based taxi booking plugin with Per KM and Per Hour rates per category (Economy, Luxury).
- Designed responsive booking UIs in Elementor with real-time fare calculation and booking tracking.

Mallorca Guider (WordPress – Elementor Travel Booking)

[kamrankhoza/malloagui](#) 

- Built a Polish-language travel guide and booking platform for Mallorca with Elementor, offering one-day excursions, local attractions, and hotel-based trip discovery across the island.
- Implemented tour catalog pages with pricing, schedules, and online reservation flows, plus hotel search, customer reviews, and a streamlined booking experience for vacation planning.

Quran Search Application (Django - Voice Recognition)

[kamrankhoza/quranvers](#) 

- Voice Recognition: Integrated advanced voice recognition technology to convert spoken words into text, allowing users to search Quranic verses with ease.
- Verse Search: Enabled users to search for specific verses by speaking, uploading audio files, or typing Arabic text, improving efficiency over traditional methods.

DeFi LaunchPad (T3 - NextUI & ShyftRPC)

[kamrankhoza/dex-app](#)

- Constructed token launch features, including presale logic, tax mechanisms, and dual token types (standard & team-based).
- Ensured token and fund security with post-sale claiming and escrow-like safeguards.

Escrow Commerce (Laravel – Escrow & Crypto Pay)

[kamrankhoza/conceptbig](#)

- Designed a crypto-enabled e-commerce system with escrow-based payments, shopping carts, and multi-currency support via Coinbase/BitPay.
- Secured transactions with encrypted wallets, admin dashboards, and user alerts.

Skills

Hard Skills:	TypeScript (Advanced), JavaScript (Advanced), PHP (Advanced), Node.js (Advanced) SQL (Advanced), MongoDB (Intermediate)
Soft Skills:	Teamwork, Time Management, Adaptability, Critical Thinking
Additional Skills:	Technical Writing, Communication, Lifelong Learning, Community Involvement

Certifications - Technical Programming
